## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-19, drawn to a method for crowning a screen assembly, classified in class 209, subclass 409.
- II. Claim 21-24, drawn to a screen assembly, classified in class 209, subclass 308.

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the process of crowning a screen assembly by forcing the sides of the support down with the crowning apparatus, as claimed, can be practiced by another materially different apparatus, such as a screen assembly which does not have a upwardly projecting member configured to be received in a corresponding hole.

Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.
